

Your Leading Renewable Energy Partner

Empowering
NET-ZERO FUTURE

About us

We:

Founded in 1997, LUBI Electronics began as an automation services company, laying the foundation for a journey of innovation & excellence

Established Legacy:

As the sister concern of LUBI Pumps LLP, a leading pump manufacturer with a legacy dating back to 1965, we inherit a tradition of reliability and quality

Presence:

PAN India presence, 11 representative offices

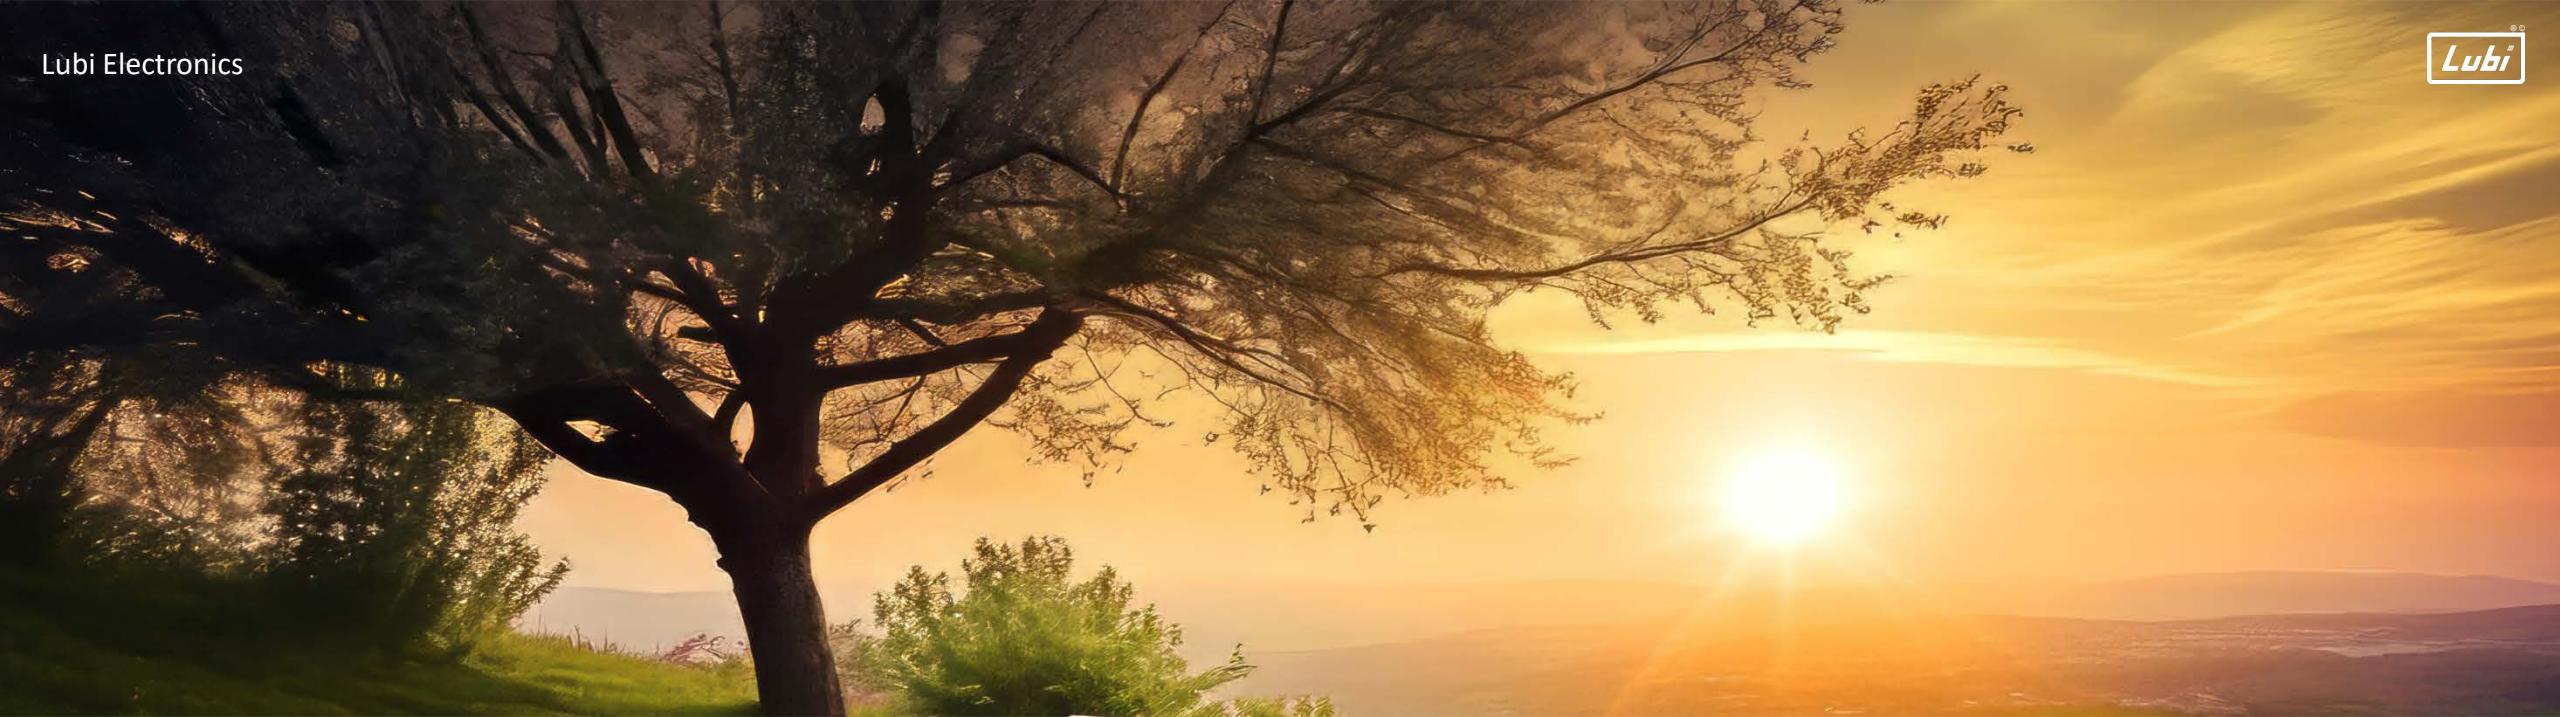

Strength:

Over 250+ technical experts across business verticals

Solar EPC Services:

A well known operator in solar EPC services space, with extensive experience in installation of integrated solar water pumping systems to rooftop based solar plants at premier industrial and government buildings

Expanding on business, LUBI has ventured aggressively into multi-MW ground mounted projects completing the offerings in the solar services portfolio

Our Impact at a Glance

4+ Clean Energy Solutions
Pioneering Solar, Wind, BESS,
Green Hydrogen

35000+ Solar Pumps Installed
Powering large-scale clean
energy infrastructure across
India.

10+MW Installed

Revolutionizing energy with
vast renewable projects.

100+MW in Pipeline

Expanding our footprint with
Cutting-edge projects.

22 States in India Transformed
Leading sustainable change across
the nation and beyond

Integrated Clean Energy Solution Provider

01.

Utility-Scale Solar EPC

End-to-end solar infrastructure for industrial-scale energy needs

02.

Wind-Solar Hybrid

Dual-source systems that maximize energy output, efficiency & flexibility

03.

Renewable IPP Solutions

Long-term clean energy solutions Through owned assets for clients

04.

Battery Energy Storage (BESS)

Round-the-clock power through advanced energy storage solutions

05.

Green Hydrogen & Ammonia Solutions

Custom hydrogen & ammonia for clean industrial fuel

06.

O&M Services

Full-lifecycle support through real-time monitoring and expert maintenance

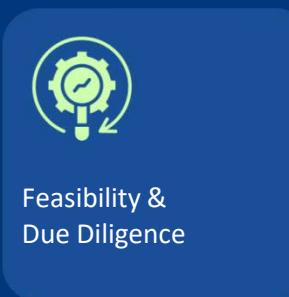

Operating Models

Model	What is Means	What we do
 Capex	Client funds and owns the asset	We offer turnkey EPC services, including project design, execution, and investment facilitation
 Group Captive	Multiple entities co-own a project	We ensure seamless implementation, support group structuring, and provide complete EPC and banking support
 Third Party Access	Clients purchase power without owning the asset	We develop and manage the plant, handling everything from design to delivery and regulatory approvals

From Land to Grid : Our Project Lifecycle

Land Identification

Feasibility &
Due Diligence

Design & Engineering

Procurement &
Construction

Commissioning

Operations &
Maintenance

Our Renewable Footprint Across India

10MW+

Developed Portfolio

100MW+

In Pipeline

35000+ Solar Pumps Installed Across 22 States

Solving **Real Energy** Transition Challenges

Problem
No inhouse expertise

Solution
Plug & play energy parks

Problem
Need round the clock green power

Solution
Hybrid + BESS integration

Problem
Complex approvals

Solution
Full regulatory and liaison support

Problem
High execution risk

Solution
Proven track record across 22 states
